The Clinical Respiratory Journal - Wiley Online Library

The majority of adults with chest pain and/or dyspnea do not have a pulmonary embolism (PE). There is strong evidence that in patients with low pre-test probability as determined by a clinical prediction rule (e.g., Wells score), a negative highly sensitive D-dimer assay effectively excludes clinically important PE.

Clinical psychology is an integration of science, theory and clinical knowledge for the purpose of understanding, preventing, and relieving psychologically-based distress or dysfunction and to promote subjective well-being and personal development. Central to its practice are psychological assessment, clinical

formulation, and psychotherapy, although clinical psychologists also engage in ...

Clinical psychology - Wikipedia

Weaning begins when we believe that the patient has recovered adequately from acute respiratory failure. Clinical assessments are needed to determine when the patient is then ready for discontinuation of ventilatory support and extubation.
