with complex numbers as well as the geometric representation of complex numbers in the euclidean plane.

We will therefore without further explanation view a complex number $x+iy$ as representing a point or a vector (x,y) in \mathbb{R}^2 , and according to our need we shall speak about a complex number or a point in the complex plane.

These days queries of standard search engines yield an abundance of articles, applets and various course materials on the World Wide Web that implement graphical approaches to Complex Analysis. An excellent starting point is the page "Websites related to Visual Complex Analysis" [18].
