Computational chemistry is a branch of chemistry that uses computer simulation to assist in solving chemical problems. It uses methods of theoretical chemistry, incorporated into efficient computer programs, to calculate the structures and properties of molecules and solids. It is necessary because, apart from relatively recent results concerning the hydrogen molecular ion (dihydrogen cation ...

Computational science and engineering (CSE) is a relatively new discipline that deals with the development and application of computational models and simulations, often coupled with high-performance computing, to solve complex physical problems arising in engineering analysis and design (computational engineering) as well as natural phenomena (computational science).

Undergraduate research, public outreach, summer internships, publications, and R&D projectsâ€”thereâ€™s a lot going on in the Department of Physics at High Point University. We invite you to browse our website, blog, course materials, and photo galleries. But if you really want to know what we are about, we encourage you to come to campus and spend time with our faculty, our physics majors, and ...

FUNDAMENTAL UNSOLVED PROBLEMS IN PHYSICS AND ASTROPHYSICS

Introduction: Welcome to our physics learning page. We are very excited about our physics page as we believe it will remove some of the "mystery of physics" and make it much easier to learn.

The primary objective of this book is to present and develop the fundamentals and principal applications of plasma physics, with an emphasis on what is usually called high-temperature plasma physics where the plasma is nearly fully ionized with nearly negligible effects of neutral particles on the plasma behavior.

This is the first tutorial in the "Livermore Computing Getting Started" workshop. It is intended to provide only a very quick overview of the extensive and broad topic of Parallel Computing, as a lead-in for the tutorials that follow it.

While our foundation has held firm, we pride ourselves on continuing to modernize the curriculum and our teaching practices. The prestigious 2016 Bernard M. Gordon Prize for Innovation in Engineering and Technology Education is a nod both to our history and to our future, recognizing WPI's project-based curriculum developing leadership, innovative problem-solving,
