Brain training (also called cognitive training) is a program of regular mental activities purported to maintain or improve one's cognitive abilities. It reflects a hypothesis that cognitive abilities can be maintained or improved by exercising the brain, analogous to the way physical fitness is improved by exercising the body.. Although there is strong evidence that aspects of brain structure ...

Epistasis is the phenomenon where the effect of one gene is dependent on the presence of one or more 'modifier genes', i.e. the genetic background. Originally the term meant that the phenotypic effect of one gene is masked by a different gene (locus). Thus, epistatic mutations have different effects in combination than individually. It was originally a concept from genetics but is now used in ...

Concepts such as disease and health can be difficult to define precisely. Part of the reason for this is that they embody value judgments and are rooted in metaphor. The precise meaning of terms like health, healing and wholeness is likely to remain elusive, because the disconcerting openness of the outlook gained from experience alone resists the reduction of first-person judgments (including ...
