Culturally relevant or responsive teaching is a pedagogy grounded in teachers' displaying cultural competence: skill at teaching in a cross-cultural or multicultural setting. They enable each student to relate course content to his or her cultural context. While the term often deals specifically with instruction of African American students in the United States, it has been proven to be an ...

In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense "related". The objects correspond to mathematical abstractions called vertices (also called nodes or points) and each of the related pairs of vertices is called an edge (also called an arc or line).
